SUMMARY

Full-stack developer with 3+ years of experience building scalable, responsive mobile and web applications using React Native, React, and .NET. Skilled in designing and integrating REST APIs, managing state with Redux, and developing backend services with C# and .NET. Experienced across the full development lifecycle, from UI/UX implementation to backend architecture and deployment, with a strong focus on clean, modular, and maintainable code.

EXPERIENCE

Info-X Software Technology Pvt. Ltd. — Full Stack Developer *Feb 2026 - Present*

- Developed customer-facing features in React for a logistics platform, including shipment tracking, order management, invoicing, and reporting views, giving customers real-time visibility into their shipments and account activity.
- Built and maintained RESTful APIs in .NET/C# to handle order and shipment data, supporting creation, updates, and retrieval for the customer portal.
- Integrated third-party SMS and payment gateway services into the backend, enabling automated shipment status notifications and secure invoice payments.
- Collaborated across frontend and backend to deliver end-to-end features, from API design in .NET to UI implementation in React.

Jupiter Orison Pvt Ltd, Gurugram — Full Stack Developer *Apr 2024 - Feb 2026*

- Built Repair India, a cross-platform service marketplace platform (similar to UrbanCompany) for appliance repair and home services, using React Native for mobile, React for web, and .NET/C# for backend APIs.
- Developed core platform features including service booking, scheduling, provider allocation, and real-time service status updates across mobile and web clients.
- Designed and implemented RESTful APIs in ASP.NET Core to handle bookings, user accounts, and service provider data, integrating with the mobile and web frontends.
- Implemented a user rating and review system, service filters, and location-based service provider allocation.
- Worked across the full stack, from API design in .NET to UI implementation in React and React Native, owning features end-to-end.

Websultanate Software Tech., Lucknow — Software Developer *Feb 2023 - Mar 2024*

- Built Pool Tester, a React Native app for swimming pool maintenance and chemical calculations, featuring camera/photo input for capturing pool test strips and form validation for accurate readings.
- Published Pool Tester on the Apple App Store, handling app signing, metadata creation, screenshots, and compliance with Apple's guidelines.
- Developed the frontend for Scrooge, a gaming website featuring games like Poker and Ludo, using React.js.
- Built a real-time chat feature using Socket for user interaction within the platform, enhancing engagement across games.

EDUCATION

University of Allahabad

Bachelor of Computer Application | 2019 - 2022

SKILLS

Languages: JavaScript, TypeScript, C#

Frontend & Mobile: React, React Native, Redux, HTML, CSS

Backend: .NET, ASP.NET Core, Entity Framework, LINQ, Web APIs, Socket

Databases: SQL Server, MySQL

Cloud & DevOps: AWS, Azure, Docker, Git, GitHub

Practices & Tools: Agile/SCRUM, API Authentication & Versioning, Android Studio, Xcode
